ASSESSMENT

COURSE LEARNING OUTCOME(S)	ASSESSMENT	WEIGHT
1 - 7	Portfolio-Based Language Assessment (PBLA) is utilized to assess and evaluate learners' progress in language learning. PBLA facilitates assessment for learning by documenting students' language learning over time, highlighting strengths and challenges, and providing frequent opportunities for feedback, reflection, self-assessment, and revision. A combination of formative and summative assessment is used to monitor learner progress against course outcomes. Testing occurs at midpoint and at the end of each term. Instructor observations, anecdotal notes, marked work, portfolio assessment and summative testing all factor into the CLBs assigned at term end.	P/BD/F

Important: For details on each assignment and exam, please see the Course Offering Information.

ADDITIONAL INFORMATION

The Canadian Language Benchmarks (CLBs) include four strands, listening, speaking, reading, and writing. To increase a CLB in a strand, learners must successfully complete most of the criteria on the assessed tasks in that strand. To progress to the next level, your CLBs must go up in at least three strands. For example, if your CLBs go up in three or four strands, you may be eligible to progress to the next level. However, if your CLBs go up in two or fewer strands, you will continue in the same level next term.

Additional information may be found in the Course Offering Information or in Brightspace.

Online proctoring enables online exam taking within a controlled and monitored environment, thereby enhancing academic integrity. Online proctoring may occur through a variety of methods, including but not limited to:

a. live online proctoring where a remote invigilator authenticates identity and observes completion of an exam using specialized software and recordings;
b. automated proctoring where the exam session is recorded and AI (artificial intelligence) analyzed;
c. browser lockdown that limits access to other applications, websites, copying, printing, screen capture and other functions; or
d. a combination of both live/automated proctoring and browser lockdown.

Course instructors will review recordings, analyses, and data obtained through online proctoring for academic integrity infractions. It is the student's responsibility to meet the technical, software, location, and identity verification requirements necessary to enable online proctoring.
