CYCR2501 Advanced Child and Youth Care Counselling

COURSE DESCRIPTION

This advanced counselling course builds off the foundational counselling course, while deepening students' understanding and application of counselling theory and skills within a Child and Youth Care (CYC) framework. Emphasizing a culture and diversity lens, students explore and integrate strength-based, client-centered, and trauma-informed approaches to support children, youth, and families. Through reflective and reflexive practice, students critically examine their own values, beliefs, and positionality, and assess how these influence their counselling approach. Students will engage in peer and self-evaluation to enhance their counselling competencies, while applying ethical and culturally responsive strategies in real-world CYC contexts. The course fosters professional growth through the integration of theory, practice, and critical reflection, preparing students to provide meaningful, inclusive, and effective support in diverse care environments.

Examinations for this course may require proctoring through an online proctoring service. Online proctoring enables online exam taking within a controlled and monitored environment, thereby enhancing academic integrity. Online proctoring may occur through a variety of methods, including but not limited to:

a. live online proctoring where either the course instructor, a representative of Bow Valley College, or a remote invigilator authenticates identity and observes completion of an exam using specialized software and recordings;
b. automated proctoring where the exam session is recorded and AI (artificial intelligence) analyzed;
c. browser lockdown that limits access to other applications, websites, copying, printing, screen capture and other functions; or
d. a combination of both live/automated proctoring and browser lockdown.

Course instructors will review recordings, analyses, and data obtained through online proctoring for academic integrity infractions. It is the student's responsibility to meet the technical, software, location, and identity verification requirements necessary to enable online proctoring.
