RELE9203 Practice of Rural Real Estate

COURSE DESCRIPTION

The Practice of Rural Real Estate is a pre-licensing course for real estate professionals wishing to specialize in rural real estate. The course discusses the complexities of selling and buying rural real estate of an agribusiness nature such as farms, ranches, and crop and livestock operations. After completing this course, real estate professionals should be able to competently represent sellers and buyers in their rural transactions. The course builds on the concepts introduced in the Fundamentals of Real Estate and focuses on developing the rural knowledge, skills, and abilities that rural real estate professionals require for their practice. It covers such topics as rural land descriptions, agricultural products, private water systems, septic/sewage systems, environmental concerns, rural property title and registrations and other legal matters, rural property valuations, and rural utilities and services. The course takes an applied perspective by focusing on the due diligence expected of rural real estate professionals when representing sellers and buyers in their respective transactions.
